**Re: Perteet Inc. announces the appointment of Denise Cieri, long-time WSDOT program administrator, to its board of directors.**

Everett, Wash: April 7, 2022 – Perteet Inc.

Perteet today announced Denise Cieri has joined its board of directors. Until two years ago, when she began her consulting firm, Denise worked for WSDOT as a program administrator on some of Washington State’s most significant projects, including SR 520 Bridge Replacement, Alaskan Way Viaduct, and I-405 Express Toll Lanes. She is a University of Washington graduate and a champion of public infrastructure and its role in our community.

“We need to strengthen our professional community,” Denise said. “Our state has more than \$17 billion worth of projects and programs to deliver over the next 16 years, and strong firms and professionals will be key to delivering them. Perteet walks the walk when advocating for clients and the community, and they understand what makes communities thrive and how to work with public agencies to deliver it.”

Crystal Donner, Perteet’s president, said, “Denise’s WSDOT and Sound Transit expertise will be an important piece to our strategic growth plan. As a mid-sized firm that competes with mega-firms, her mega-project experience will be invaluable.”

Perteet Inc. is a 100% employee-owned, multidisciplinary engineering firm focused on enhancing the quality of life in Washington State by solving transportation and infrastructure challenges that make our communities function more efficiently, safer, and better. With offices in Everett, Seattle, Ellensburg, Wenatchee, and Snoqualmie, Perteet provides a wide range of civil and transportation engineering services, including construction management, transportation, planning, site/utility, energy, environmental, and emergency management services.
